

SUCCESSFUL PROJECTS.
SWISS QUALITY.

Successful projects. **Swiss quality.**

Parm AG offers software for multi-project and portfolio management as well as strategy implementation and creates company-wide transparency thanks to a consistent management system and topic-specific cockpits.

Communication as well as flow of information and tasks between corporate management and day-to-day operations is supported within one system. Our solutions are flexibly customisable, intuitive to use and can be integrated into various software products via interfaces.

Our multi-award-winning software supports over 25,000 users worldwide in all management tasks relating to strategy, projects, resources and finance.

Parm AG – A Swiss Original

RELIABLE

We are ready to support our customers at any time.

INDIVIDUAL

Our software is customisable to the specific needs of our clients – by us, but also by them.

COST-EFFECTIVE

We guarantee fixed dates, costs and scope for the implementation of our software.

SECURE

Secure operation and data storage – hosted by us, by our customers or locally operated.

HIGH QUALITY

Our employees are engineers and business managers with many years of project experience. This benefits our customers.

CONSISTENT

We strive for a long-term partnership with our customers. To this purpose, our software grows with their maturity and their demands.

GOAL-ORIENTED

We seamlessly link the strategy level with operational project management.

PIONEERING

We cooperate with universities and the Federal Ministry of Economics in the area of research and development.

Outstanding products

Impressive advantages

Parm AG products are known for reliable software, intuitive operation and solutions that can be flexibly adapted to the needs of our customers. The product portfolio includes software for project management, leadership software and an app for idea management.

With our software, you can gain a crucial competitive advantage. Parm solutions are flexible, intuitive and innovative; they are maintained and further developed over the long term.

IDEA MANAGEMENT

Encourage the development of ideas and innovations in your company. Collect, evaluate and manage all incoming ideas in one system.

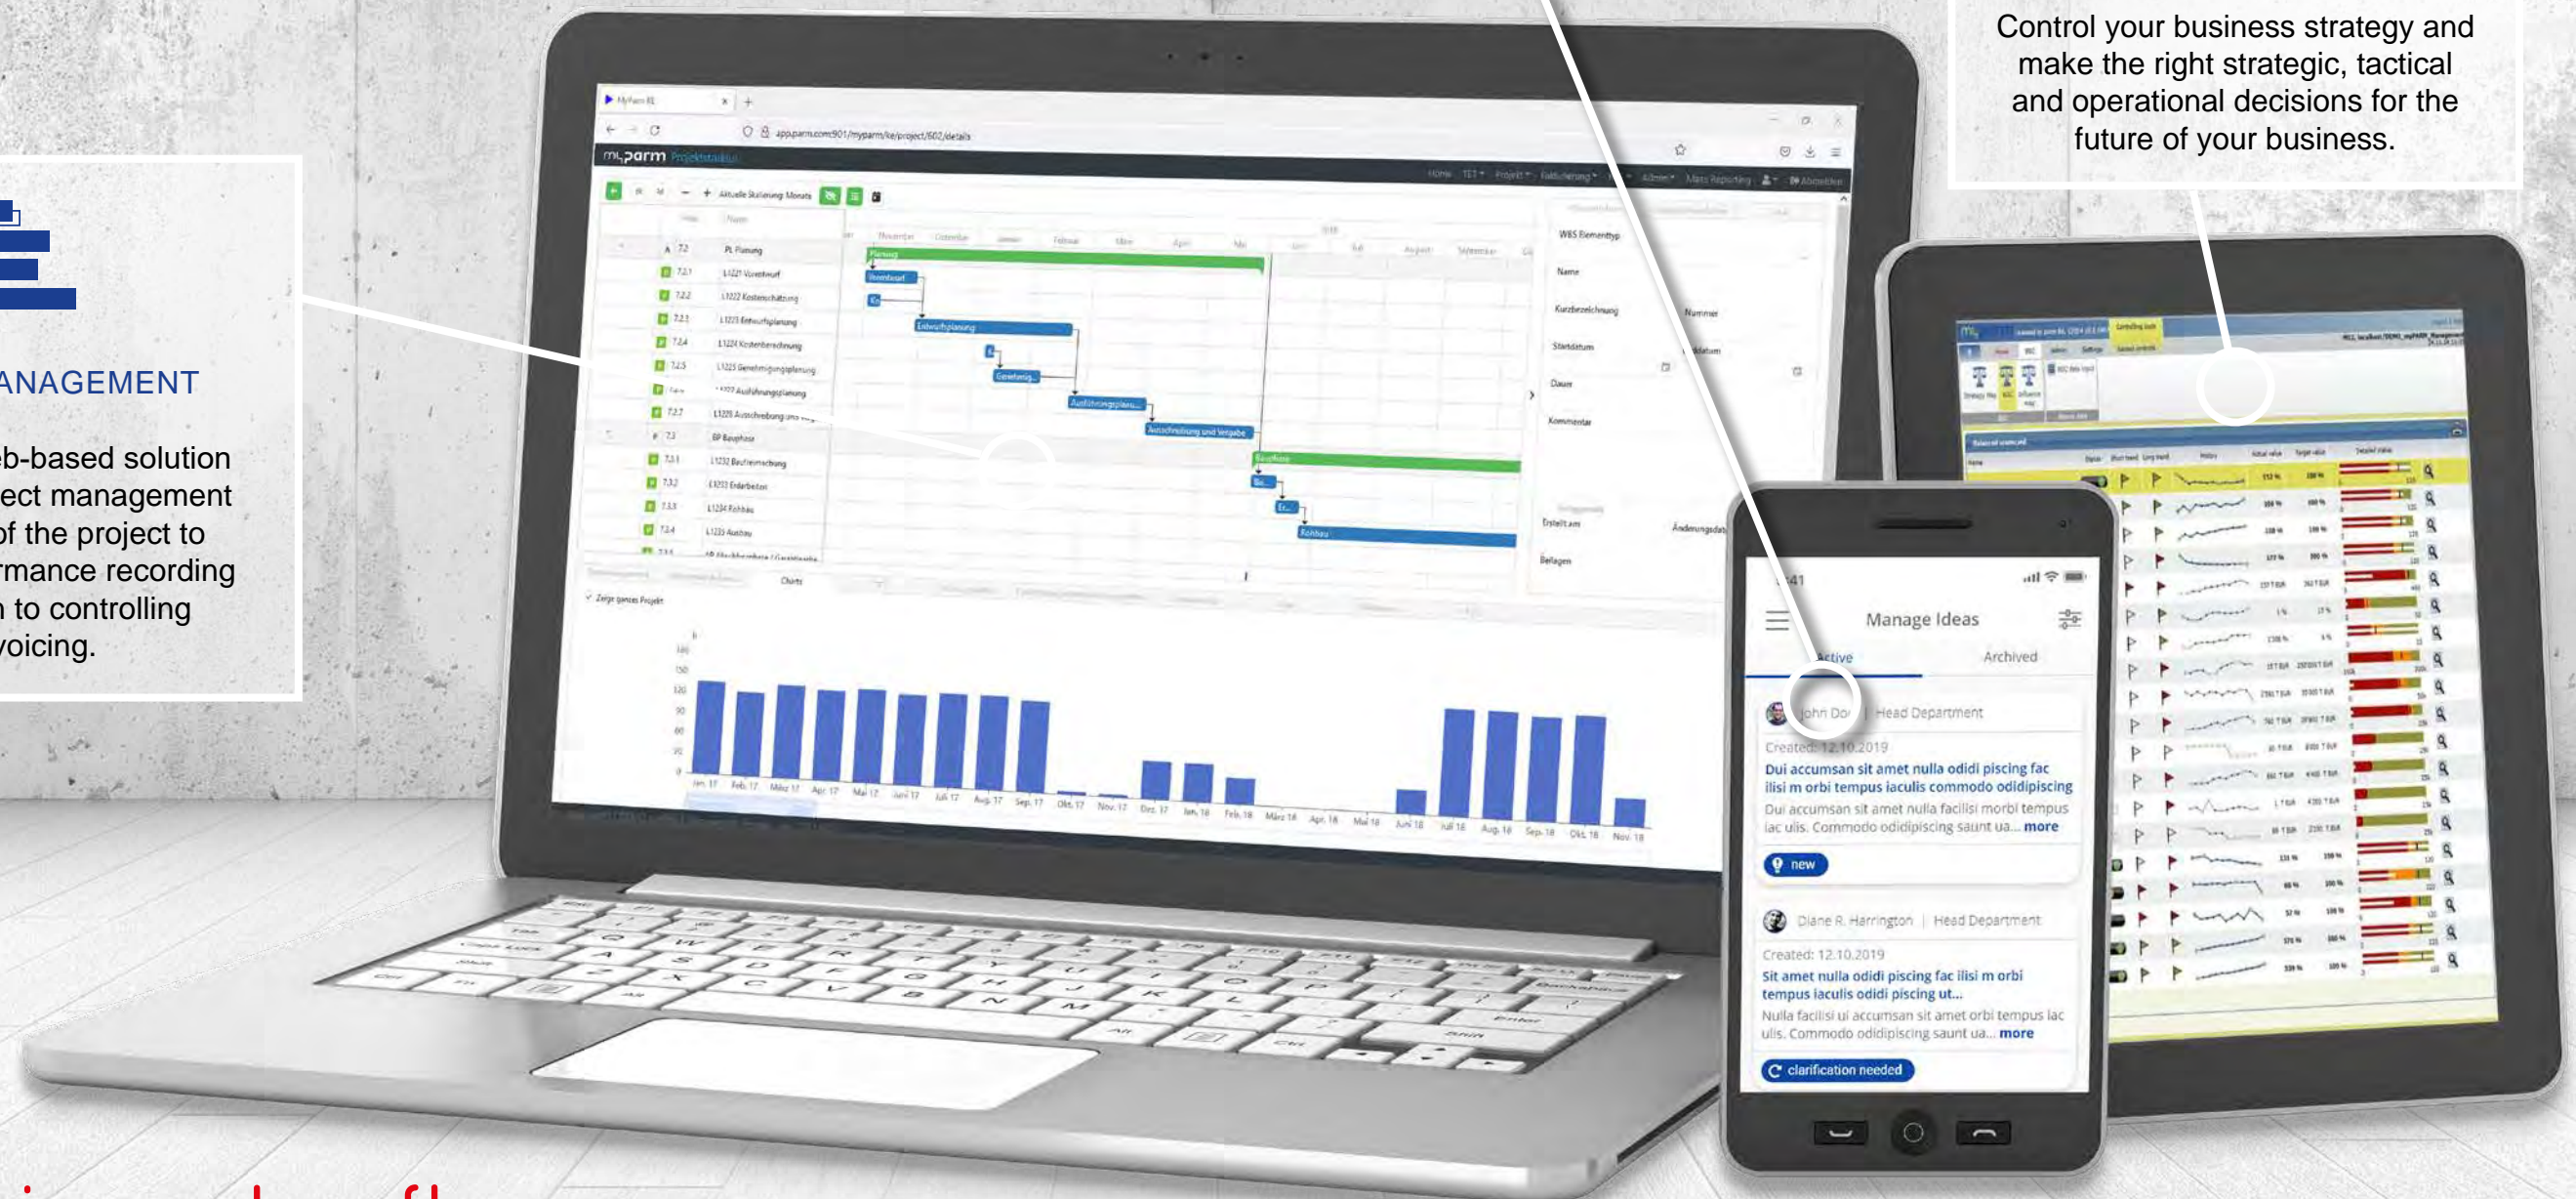

LEADERSHIP SOFTWARE

Control your business strategy and make the right strategic, tactical and operational decisions for the future of your business.

PROJECT MANAGEMENT

The modular, web-based solution covers multi-project management from the start of the project to budgeting, performance recording and execution to controlling and invoicing.

swiss made software

myPARM

Project management software

- ▶ Personalisation
- ▶ Idea management

myPARM
Leadership software

Corporate strategy is one of the most important components of management. In order to make the right decisions in this regard, management must clearly see the effects of decisions, influencing criteria and thus both external and internal risks and opportunities.

With our risk-based leadership system, we offer the appropriate solution for sustainable and successful corporate management!

myPARM supports you in defining your strategy (by means of integrated SWOT analysis, balanced scorecard, strategy and influence map, portfolio management, etc.), communicating it to the staff and instructing them to take appropriate action. By continuously comparing your ideas and instructions with operational reality, you are able to intervene in time before strategy execution gets out of hand. Likewise, new risks and opportunities are displayed to you so that you can react optimally to them.

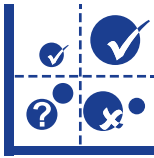

MANAGEMENT
INFORMATION SYSTEM

All decision-relevant data in your area of responsibility at a glance – for sound strategic, tactical and operational decisions.

BALANCED
SCORECARD

The Balanced Scorecard helps you to develop, implement and control your strategy.

PORTFOLIO
MANAGEMENT

Implement your strategic vision and make it come true.

SUSTAINABILITY BALANCED
SCORECARD

Links sustainability management with your corporate strategy to ensure its compliance, success and efficiency.

RISK AND OPPORTUNITY
MANAGEMENT

Systematic recording of risks and opportunities so that you can take measures to minimise risks or increase opportunities.

Idea management

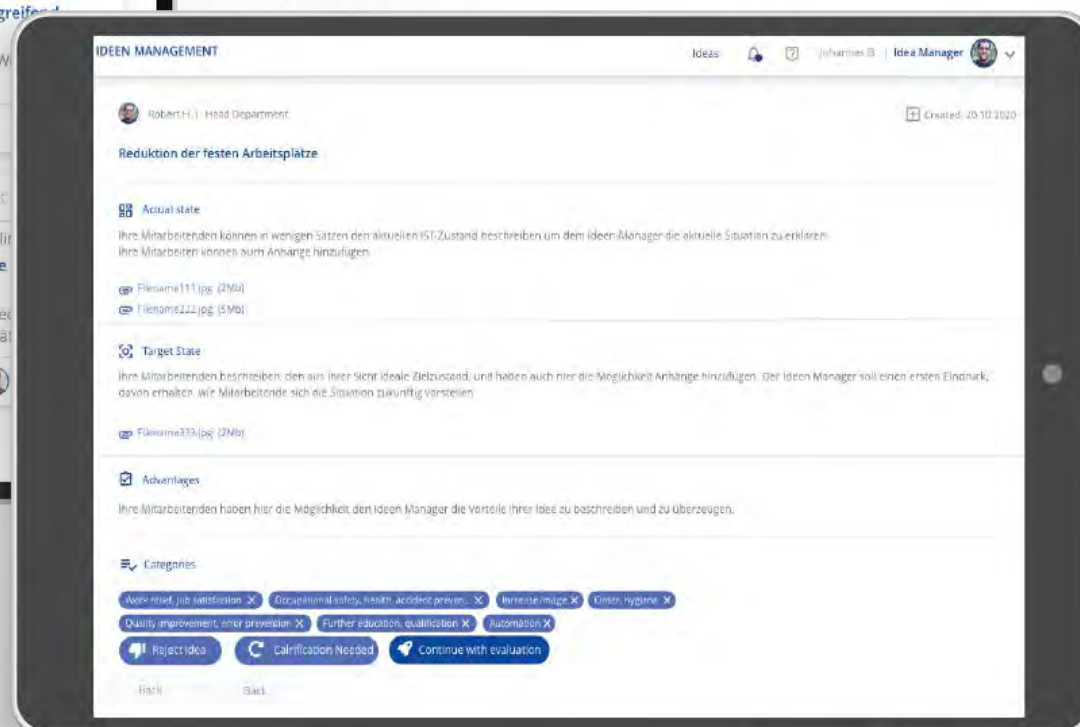

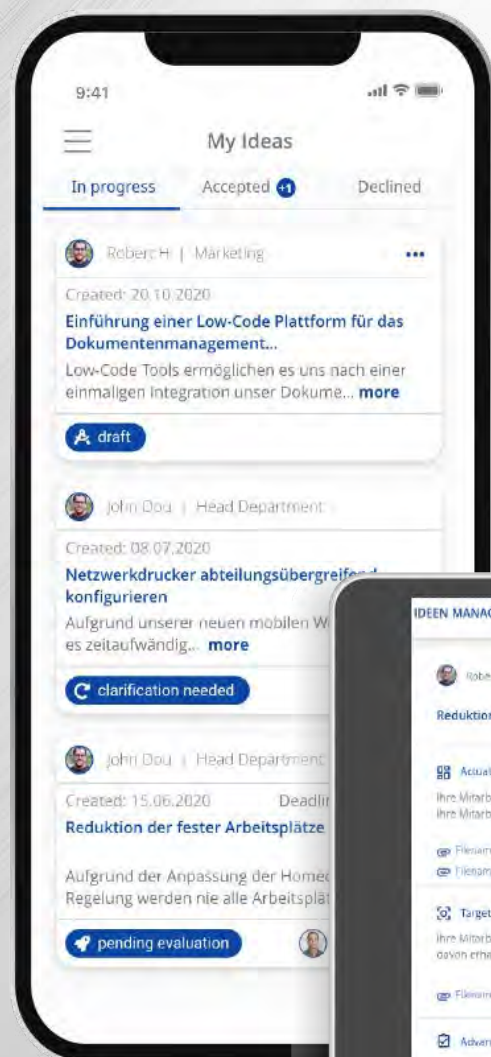

Innovation management made easy

Improve your internal processes and products, increase your company's profitability and promote innovation. Use the collective intelligence of your employees and give them the opportunity to actively participate in the success of the company.

SUBMIT IDEAS

Ideas can be submitted easily and without training at any time, in any place and on any device. With the intuitive user interface and process control, anyone can do it.

- ▶ Enter new ideas via smartphone, tablet or PC / Mac
- ▶ Optionally also with voice input support
- ▶ Any files such as photos, documents or videos can be added as attachments
- ▶ Current status and feedback of the submitted ideas is visible at all times

EVALUATE IDEAS

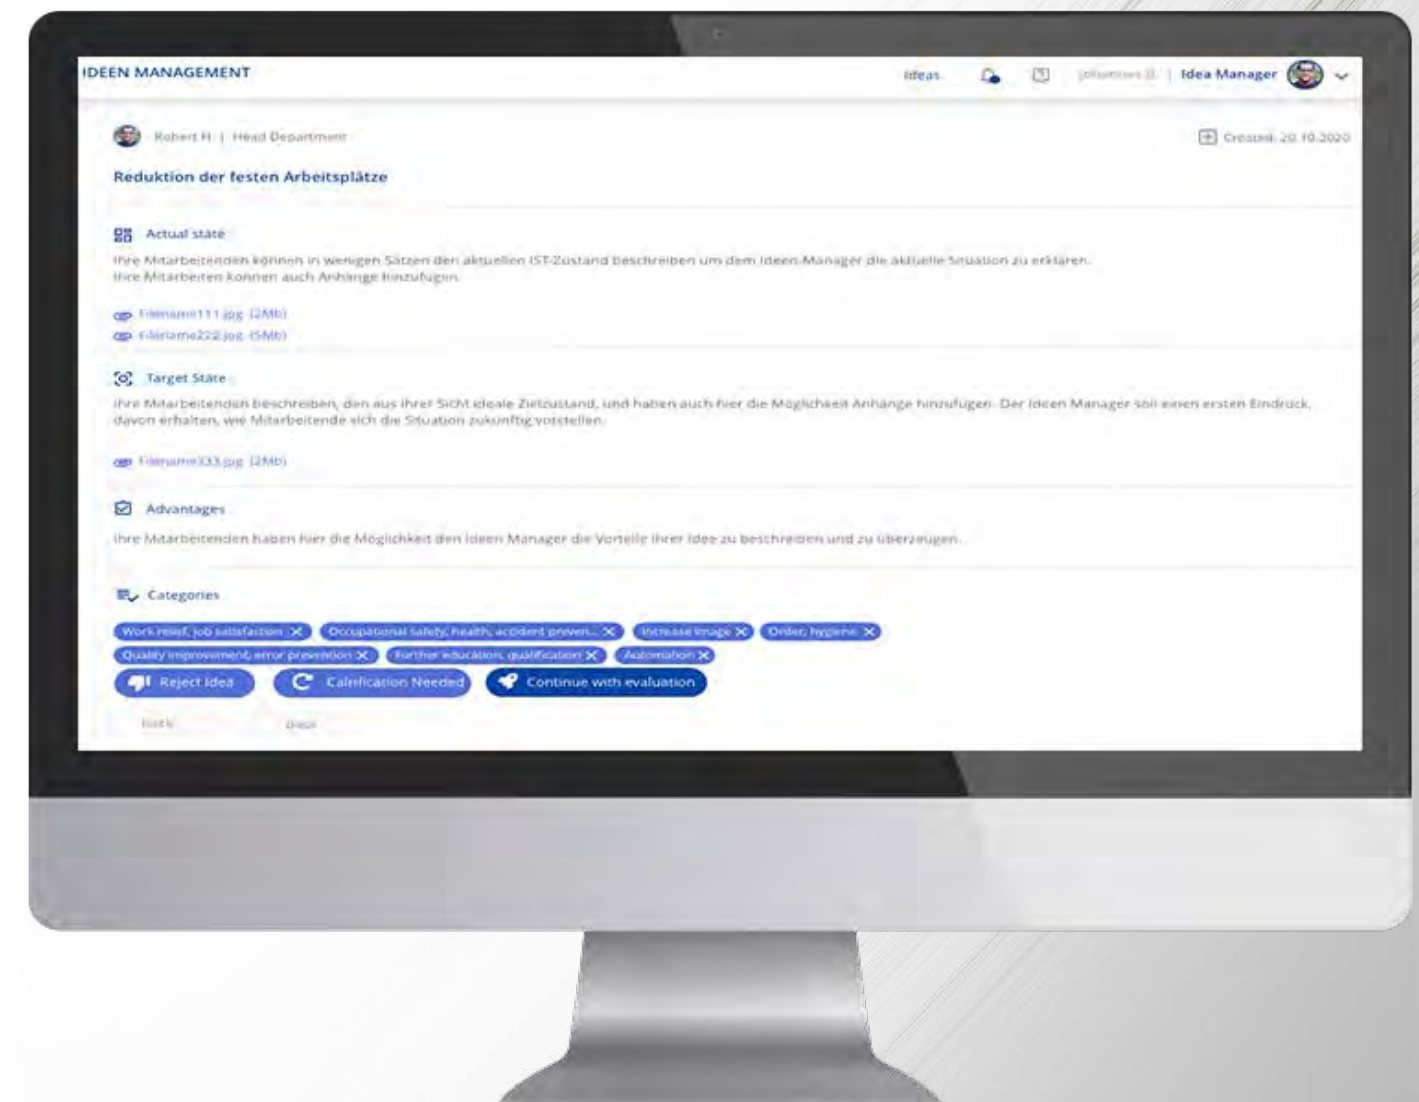

Defined experts assess the ideas assigned to them in a workflow. The assessment is carried out by calculating the benefit or, alternatively, qualitatively.

- ▶ Workflow supports the assessment process
- ▶ The current status of the ideas is always in view via a personalised cockpit
- ▶ Pending assessments are marked
- ▶ Implementation of approved ideas can be planned directly

MANAGE IDEAS

Transparent and always up-to-date overview of all ideas with status, key figures and a lot of additional information centralised in a cockpit.

- ▶ Personalised dashboard
- ▶ Export function (Excel)
- ▶ Status monitoring

SERVICE AT ITS BEST

FROM SWITZERLAND INTO THE WORLD

Parm distributes its software solutions worldwide. To date, we are represented in 39 countries around the world. We are working together with competent partners so that you can get perfect advice, consultancy and support anytime, anywhere.
