# Altus Overview

The Microsoft-native Project Portfolio Management solution for enterprise and government organisations

altus.pro

Altus turns project chaos into organisational clarity

Gain organisation-wide visibility and insights with AI-enabled project delivery, embedded in your Microsoft 365 ecosystem. Your teams can move faster, align better, and deliver on the work that matters.

Strategic portfolio management

Prioritise, evaluate, and optimise initiatives to align your projects and portfolios with what matters most to your organisation. Weighted scoring models and scenario planning enable objective comparisons focussed on strategic goal delivery.
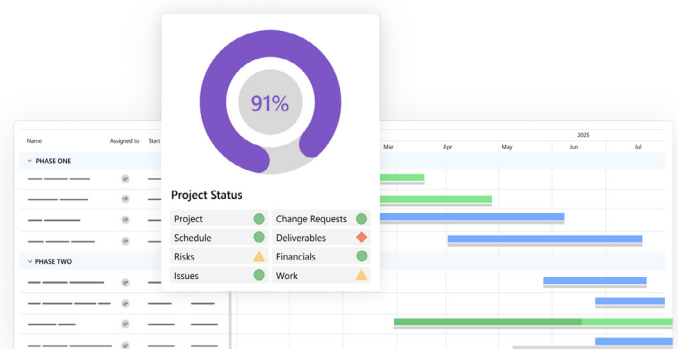

> "Good, accurate and trustworthy information means we're able to manage every project better and act early should anything start going awry. And that's the way you want it."
>
> **Director Digital Infrastructure, Mater Group**

Project portfolio management

Seamless integration with the tools your people already use to align project management across your organisation, surfacing information in one place and enabling effective oversight and decision making.

Resource Planning

Resource management

Manage resource capacity and forward planning with ease. Eliminate delays and bottlenecks quickly with 'at a glance' dashboards. Track individual and team assignments, request and approve resource allocations, monitor exceptions, workloads, and timesheets and plan for future work.
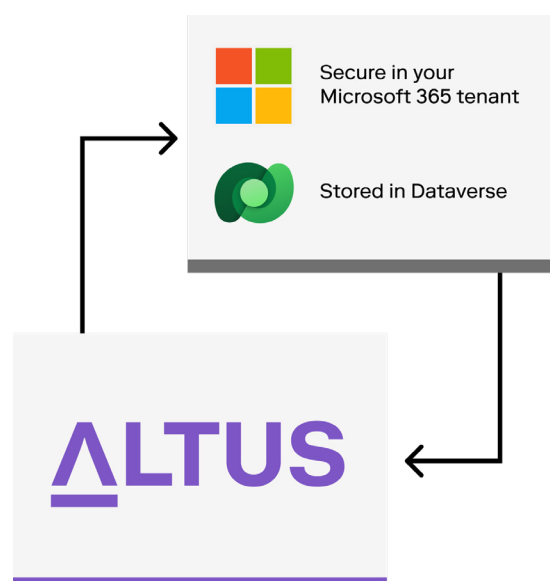

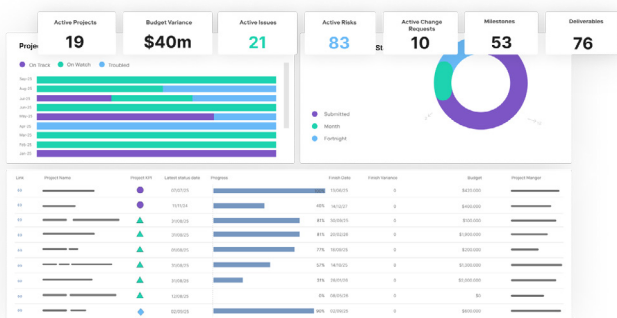

> "Altus has delivered real, tangible benefits. Project visibility has improved significantly, which helps us make better decisions and allocate resources more effectively. The drop in complaints about information access shows just how engaged our teams are, they rely on Altus every day."
>
> **Chi Keen Low, PMO Manager, UniSuper**

Built for Microsoft 365, secure in your tenant

All the benefits of cloud, without the security headaches. Altus is deployed in your Microsoft 365 tenant, with regular updates that can be deployed automatically or at time that works best for your organisation, giving your IT team full control. Best of all, Altus is Copilot-enabled, so you can realise the full power of AI without sending data outside of your environment.

Secure in your Microsoft 365 tenant

Stored in Dataverse

ALTUS

Instant insights, no setup required

Altus comes with a rich reporting pack out of the box covering projects, programs, portfolios, resources, and strategy. From drilldowns to printable status reports, you get real-time visibility across every layer of delivery, all within your Microsoft 365 environment, using Power BI.
> "Altus provided a way to examine all our schedules and be able to report on them and easily pull-out gateway milestones and key milestones. This allowed us to shift our focus to overall project management rather than previously, where the focus had been on manually managing finances."

Tim Mason, Head of PMO, Melbourne Airport

Built to integrate, ready to lead

Altus connects with the tools you already use, from Microsoft 365 to external systems like SAP, Workday, HRIS platforms, and custom line-of-business apps. With flexible APIs, configurable dataflows, and delivery enhancements, Altus becomes your single source of truth, securely deployed in your environment and tailored to fit your enterprise.

Why Altus?

Altus delivers immediate business value to organisations, providing an intuitive, collaborative, and adaptable platform that supports you now and grows with you into the future.

Data security

Your data stays within your own Microsoft 365 tenant, no external hosting, and no compromises.

Rapid deployment

Altus deploys rapidly, so your teams can start delivering value in days, not months.

Clarity you can trust

Centralise data across teams and systems to provide insights, objectivity, and predictability at every level of delivery.

Fully supported

Altus is a complete solution backed by expert support. Implementation, onboarding, and ongoing success are all part of the package.

Cloud agility, IT control

Enjoy the benefits of regular updates while keeping complete control of when they are deployed to your environment.

Partner-powered delivery

Our global partner network provides local expertise, consulting, and customisation, so Altus fits your organisation, not the other way around.

AI-powered productivity

With Copilot and intelligent automation, Altus eliminates admin and helps teams focus on what matters.

Trusted by over 200+ organisations globally

About Altus

Altus is a recognised leader in enterprise project and portfolio management, trusted across government, education, utilities, financial services, and manufacturing. Founded in Australia in 2009, Altus has grown through a strong global partner network that delivers local expertise and enterprise-grade solutions at scale.

Our collaborative ecosystem spans implementation partners, technology integrators, and strategic advisors, ensuring every Altus deployment is tailored, supported, and future-ready. Whether you're in Sydney, Stuttgart, or Seattle, Altus brings deep delivery experience and a proven track record of helping organisations align work to strategy and deliver with confidence.

Integrations that work where you do

Altus connects seamlessly with the platforms your teams already rely on; Microsoft Project, Planner, Teams, Power BI, Jira, DevOps, Dynamics, and more. Out-of-the-box templates make it easy to unify data across your ecosystem, while flexible APIs and configuration options allow Altus to integrate with your unique line-of-business systems, from finance and HR to asset management and beyond.

Whether you're consolidating schedules, syncing documents, or automating workflows, Altus becomes your single source of truth, bringing clarity, consistency, and control to every layer of delivery.
